Why we should not identify sentence structure with propositional structure	2
Meaning underdetermines what is said, therefore utterances express many propositions	2
Russellians can solve the problem of empty names with nonsingular propositions	2
Teaching & learning guide for: Act-type theories of propositions	3
Following Ben Caplan's: http://bdcaplan.ca/errata.pdf .	

Why we should not identify sentence structure with propositional structure

<https://doi.org/10.1080/00455091.2013.871111>

(ii) on p. 614 shouldn't say "lexical items" but "propositional constituents".

Thanks to Francesco Paolo Gentile.

Meaning underdetermines what is said, therefore utterances express many propositions

<https://doi.org/10.1111/1746-8361.12221>

The quotation from Grice on p. 178 should be:

'*A* meant [non-naturally] something by *x*' is (roughly) equivalent to '*A* intended the utterance of *x* to produce some effect in an audience by means of the recognition of this intention[.]' (1957, 385)

The typography is garbled in the printed version.

Russellians can solve the problem of empty names with nonsingular propositions

<https://doi.org/10.1007/s11229-018-01971-3>

On p. 5425: “My view is that these judgements are mistaken, but I think that the defender of Variation can say some plausible things to defend the view that they can be vindicated if that is ~~they~~the way their intuitions about truth lead them.”

In the references the page numbers for Timothy Williamson’s “Necessary Existents” are given as 269–287; they are in fact 233–251.

Teaching & learning guide for: Act-type theories of propositions

<https://doi.org/10.1111/phc3.12795>

The heading of section 1 should be ‘Author’s introduction’, not ‘Author’ introduction’.
